

Physical measurement of vessels less than 15 meters of length will not come to an end as of 1 July this year after all

Until the amendment to the regulations comes into force, today's practice with measurement by The Norwegian Maritime Directorate will continue.

All vessels that are to be registered in the Norwegian Ship Register- NOR must be measured for issuance of a "Certificate of Identity".

Radio Call Signs allocated by Telenor Maritime Radio may not be used upon registration.

The regulations concerning discontinuance of physical measurements will be sent affected organizations that were not included in the original inquiry.

We sincerely apologize that the changes are not being put into force as planned and ask users that are effected by this to contact us directly for clarification on their case.

Please contact The Norwegian Maritime Directorate directly for issuance of "Certificate of Identity", www.sjofartsdir.no/en/

The Ship Registers will be available to the public outside office hours June 18 in order to reply to questions regarding registrations affected by this situation. Our phones will be open until 18:00 hrs.
